SUMMARY

Frontend Engineer with 4 years building production applications for fintech; including cryptocurrency platforms. Specialized in React and Next.js with proven experience delivering real-time trading interfaces, WebSocket integrations, and high-performance web applications. Track record of improving application performance and collaborating across product, design, and backend teams in fast-paced environments.

EXPERIENCE

Frontend Engineer 02/2024 - 10/2025
Bitwyre ↗

- Architected and built the frontend for a cryptocurrency exchange platform using Next.js and TypeScript, implementing real-time price feeds via WebSocket integration for multiple trading pairs
- Developed an institutional OTC trading platform with secure transaction flows, role-based access controls, and compliance features for enterprise clients
- Improved application performance through code splitting, lazy loading, and React Query optimization, significantly reducing bundle size and initial load times
- Built cross-platform mobile features for Bitwyre's crypto card product using React Native, extending core functionality to iOS and Android platforms
- Designed and implemented comprehensive error handling for WebSocket connections, ensuring reliable real-time data delivery even during network disruptions
- Collaborated with backend engineers on API design, reducing unnecessary data transfers and improving overall platform responsiveness
- Managed deployment pipeline using Docker and Jenkins, working with DevOps team to containerize applications and automate CI/CD workflows for staging and production environments

Frontend Developer 12/2021 - 02/2024
Skyshi Digital ↗

- Delivered client projects using Next.js and React, including e-commerce platforms, marketing sites, and corporate websites in a fast-paced agency environment
- Built and maintained a scalable component library and design system used across multiple client projects, reducing development time and ensuring brand consistency
- Optimized website performance across client sites by implementing code splitting, image optimization, and caching strategies, improving Core Web Vitals scores
- Integrated analytics pipelines (Google Analytics, Mixpanel) and implemented A/B testing frameworks to enable data-driven design decisions for marketing campaigns
- Led mobile-first development approach for all projects, ensuring responsive experiences across devices and browsers with cross-browser compatibility testing
- Collaborated with designers and backend teams to translate Figma designs into production-ready components, establishing clear handoff processes and documentation
- Built an internal ticketing system using Angular, implementing features for issue tracking, assignment workflows, and status management.
- Developed a dynamic form builder with drag-and-drop functionality, supporting multiple field types, conditional logic, and real-time preview capabilities

EDUCATION

Informatics Management
AMIK Serang - Associate's Degree

12/2021 - 12/2024

CERTIFICATES

English Certificate (C1 Advanced) ↗
EF SET

11/2024 - Present

Frontend Developer (React) ↗
Hackerrank

01/2024 - Present

SKILLS

Next.js, React Router / Remix, Astro.js
React.js, React Native
Tanstack (Query, Table, Virtual)
Jotai, Zustand, Redux, Recoil
Jest, Vitest, Testing Library
Vue.js, Svelte.js
WebSocket, Socke.io, REST APIs

Node.js, Prisma, Drizzle
TypeScript, JavaScript / ES6+
CSS, CSS3, SCSS, Tailwind CSS, ShadCN
Figma, Git, GitHub, Gitkab, Docker
Search Engine Optimization
Responsive Design
User Experience & Web Accessibility
